## TREE OPENING INSTRUCTIONS

STEP ONE: Insert bottom of tree into tree stand. Insert top half into bottom half of tree.

STEP TWO: Pull bottom row of branches down so they are horizontal to the floor, making sure branches are straight. This will give your tree a more triangular shape. Starting at the back of each branch, pull the twigs up and out to create an open branch. Continue until all branches in layer are open.

STEP THREE: Continue opening each layer as you work up the tree. Pull down twigs attached to center of tree to fill in spaces located between each layer of branches.

STEP FOUR: As you reach the top, the branches are replaced with single twigs. Arrange twigs to form top of tree as shown. You are now ready to add your lights and decorations to create that perfect holiday tree.
